EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Carroll on 12/08/06.

The application has been amended as follows:

On page 1 of the specification, above "FIELD OF THE INVENTION", --This application if a continuation of application 09/660,450 filed on 9/12/2000, now abandoned-- has been inserted.

On line 2 of claim 1, after "olefin", --to produce dimers-- has been inserted.

On the last line of claim 1, --where the at least 83% weight percentage of produced product are dimers-- has been inserted.

Claims 31, 33, 34, 36-39, and 43 have been canceled.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a product as called for in claim 1. The closest art - Antonsen discloses a product as discussed in the previous Office action. However, Antonsen discloses that only 10 to 30% of total produced oligomers are dimers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
